

ON DEMAND AUDITS: AS EASY AS TAP, SWIPE, GO!

Unlock the power of mobile

Using a mobile application gives the healthcare industry the flexibility to implement audits on demand from any mobile tablet or PC. A robust solution that allows you to report on audit data dynamically without the need for IT or development resources is critical for objective audits. In today's environment where healthcare guidelines, safety concerns, and patient trends fluctuate daily, an easy to use mobile tool can give you the control and oversight that are essential to your success.

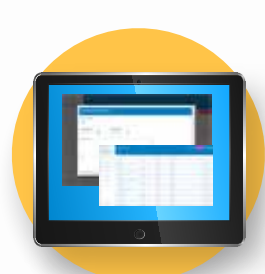

Rapidly identify internal control concerns.

Mitigate risk by deploying resources to the most high-risk areas.

NO IT integration needed.

Access critical data with visibility that is unachievable with paper.

Fast, efficient, and effective

In today's complex healthcare risk environment, your healthcare system can gain instantaneous efficiency and results using real-time data to effectively manage healthcare compliance.

Fast implementation ready asap

Improve efficiencies with immediate, repeatable, digital audit results.

Easy to use (tap, swipe, and go)

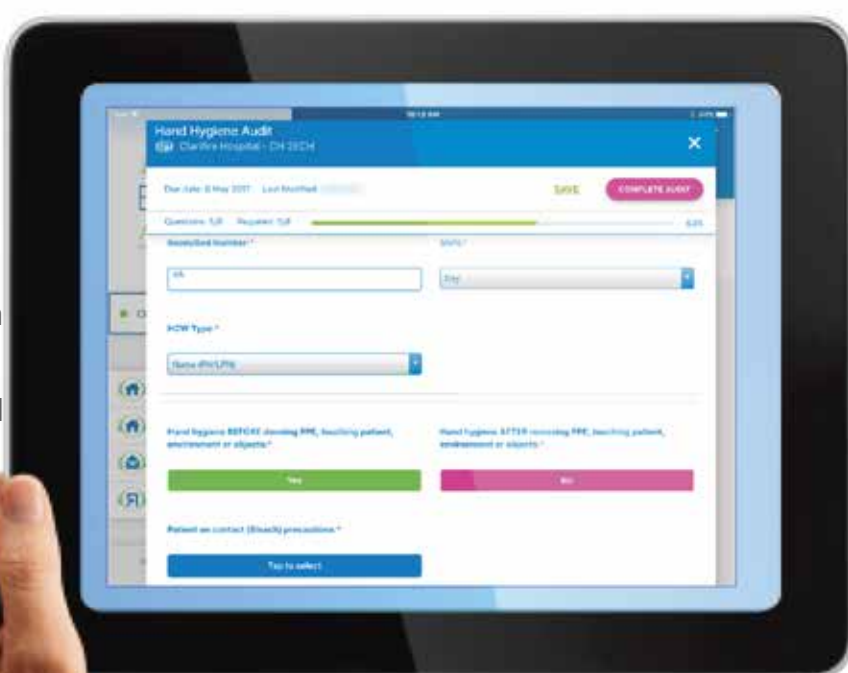

Work simply, achieve more

BRIGHT AUDITS is brighter than the rest because it exemplifies simplicity, yet maintains key system-wide workflow capabilities, such as role definition, user assignments, automated launching of audits, as well as view access across your organization. This facilitates accountability, management, and multi-level oversight.

Dynamic reporting and system wide views.

Access seven different question types versus industry standard of two.

Ease of use ... leave input complexity behind; tap, swipe, gesture, tap, go!

Select unlimited user access and audit creation at a price you can afford!

Gain speed to market with proven ease of implementation. Just download, setup, and go!
