hours lost per year on average per employee by Financial Services Providers due to inefficient processes

agree that huge savings can be achieved by streamlining operational workflows

of executives feel that regulatory costs have a negative inpact on profitability

80%

say automated workflow solution will help generate more accurate detail THE NEED FOR INCREASED OPERATIONAL EFFICIENCIES

think transforming their core processes will be needed to become lean, agile, and achieve better risk management and compliance

### WHAT'S STOPPING EXECUTIVES FROM IMPLEMENTING NEW TECHNOLOGY?

#### cost of investment in existing technology

#### need to show ROI in 18 months

## WORKFLOW AUTOMATION

DELIVERING INNOVATION O FOR SERVICE PROVIDERS

standardization of complex processes to automate repetitive tasks and eliminate manual tasks increasing operational efficiencies

configurable business rules that drive workflow to optimize your servicing operations

aggregation of data, images, and notes in one application for easy access

centralized dashboard views to monitor deadlines and increase lifecycle visibility

secure, easy to use portal to provide customers with interactive communication with your team

workflow automation sits on top of your existing back office systems (loan origination system or mortgage servicing platform) and aggregates the data into a single view easy to use/change configurable workflow processes allow you to meet time to market demands for regulatory and operational changes

provides the ability to supplement those systems with auditable, standardized processes to mitigate risk and facilitate compliance
